INVITATION

PAKS NUCLEAR EXPANSION – CONSTRAINTS AND RISKS

Date: 12 June 2013, 10.00-12.30

Location: MagNet House, room Juhar
Budapest, 6th district, Andrásy Avenue 98.

The expansion of Paks Nuclear Power Plant has been a persistent issue in parliamentary politics, still, only little information has been leaking about the details of decision making. However, the investment amounting to billions of Euros would determine Hungary's energy policy and economy for decades. Meanwhile, essential questions are not answered:

- Does Hungary need the expansion at all?
- Who will pay for the new nuclear units?
- Is there a danger of getting into serious debts?
- What kind of political and economical risks should be taken into account? Why is decision making not transparent?
- Who is responsible for the consequences of a possibly wrongheaded energy policy decision?

We are looking for answers to these questions at this event, with national and international experts.

REGISTRATION:

Attendance is free of charge, but the number of places is limited. Please register at Szilvia Engi's e-mail address, eszilvi@energiaklub.hu, until 10 June 2013. The languages of the event are Hungarian and English, translation will be provided.
